## REMARKS

During the week ending the 21st December, 1946 in British India (excluding Sind) and in the Indian States shown in this statement, the total number of deaths recorded in 213 towns having a population of 30,000 and over was 9,430. The mid-year estimated population of these towns was 25,027,240 and the death rate was 19·6 per thousand of the population. Births in the same towns numbered 16,220 giving a birth rate of 33·7 per thousand of the population. In British India alone the corresponding birth and death rates were 33·9 and 19·6 per thousand of the population respectively.

(A) *British India*.—The following towns in British India, returned a high death rate of 50 or over per thousand of the population.

Nabadwip (83·3); Tiruvannamalai (55·3) and Gaya (51·4).

The high death rate in Nabadwip was largely due to deaths from cholera and fevers. In Gaya, deaths from fevers and dysentery and diarrhoea accounted for nearly half the total number of deaths. In Tiruvannamalai, the highest number

of deaths among the six specific groups were recorded under dysentery and diarrhoea.

In 195 towns in British India there were 58 deaths from cholera, 23 deaths from smallpox and 14 deaths from plague. Of the deaths from cholera, Nabadwip recorded 30; Calcutta 10; Bhagalpur 9; Krishnagar 3; Patna, Dinapur-Nazamat, Howrah and Bally one each. Of the deaths from smallpox Ajmer recorded 11; Delhi 4; Calcutta and Raipur 2 each; Peshawar, Ambala, Madras and Beawar one each. Of the deaths from plague Poona and Tiruvannamalai recorded 4 each; Coimbatore 2; Cawnpore, Pandharpur, Bijapur and Dharwar one each.

(B) *Indian States*.—Amongst the Indian States shown in this statement, there was no town which had a high death rate of 50 or over per thousand of the population.

In 18 towns of the Indian States there were 4 deaths from smallpox of which Baroda, Jolhpur, Jamnagar and Bopal cities each recorded one and 2 deaths from plague were recorded in Mysore City. Cholera was absent during the week.
